Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Approximately 1000 chinook salmon
spawn in Chignik Creek annually.
We have observed fish as far upstream
as the forks near Schneider Lake + Trib NO #4027
add Trib # 247-41-10200-2081-3065-4027

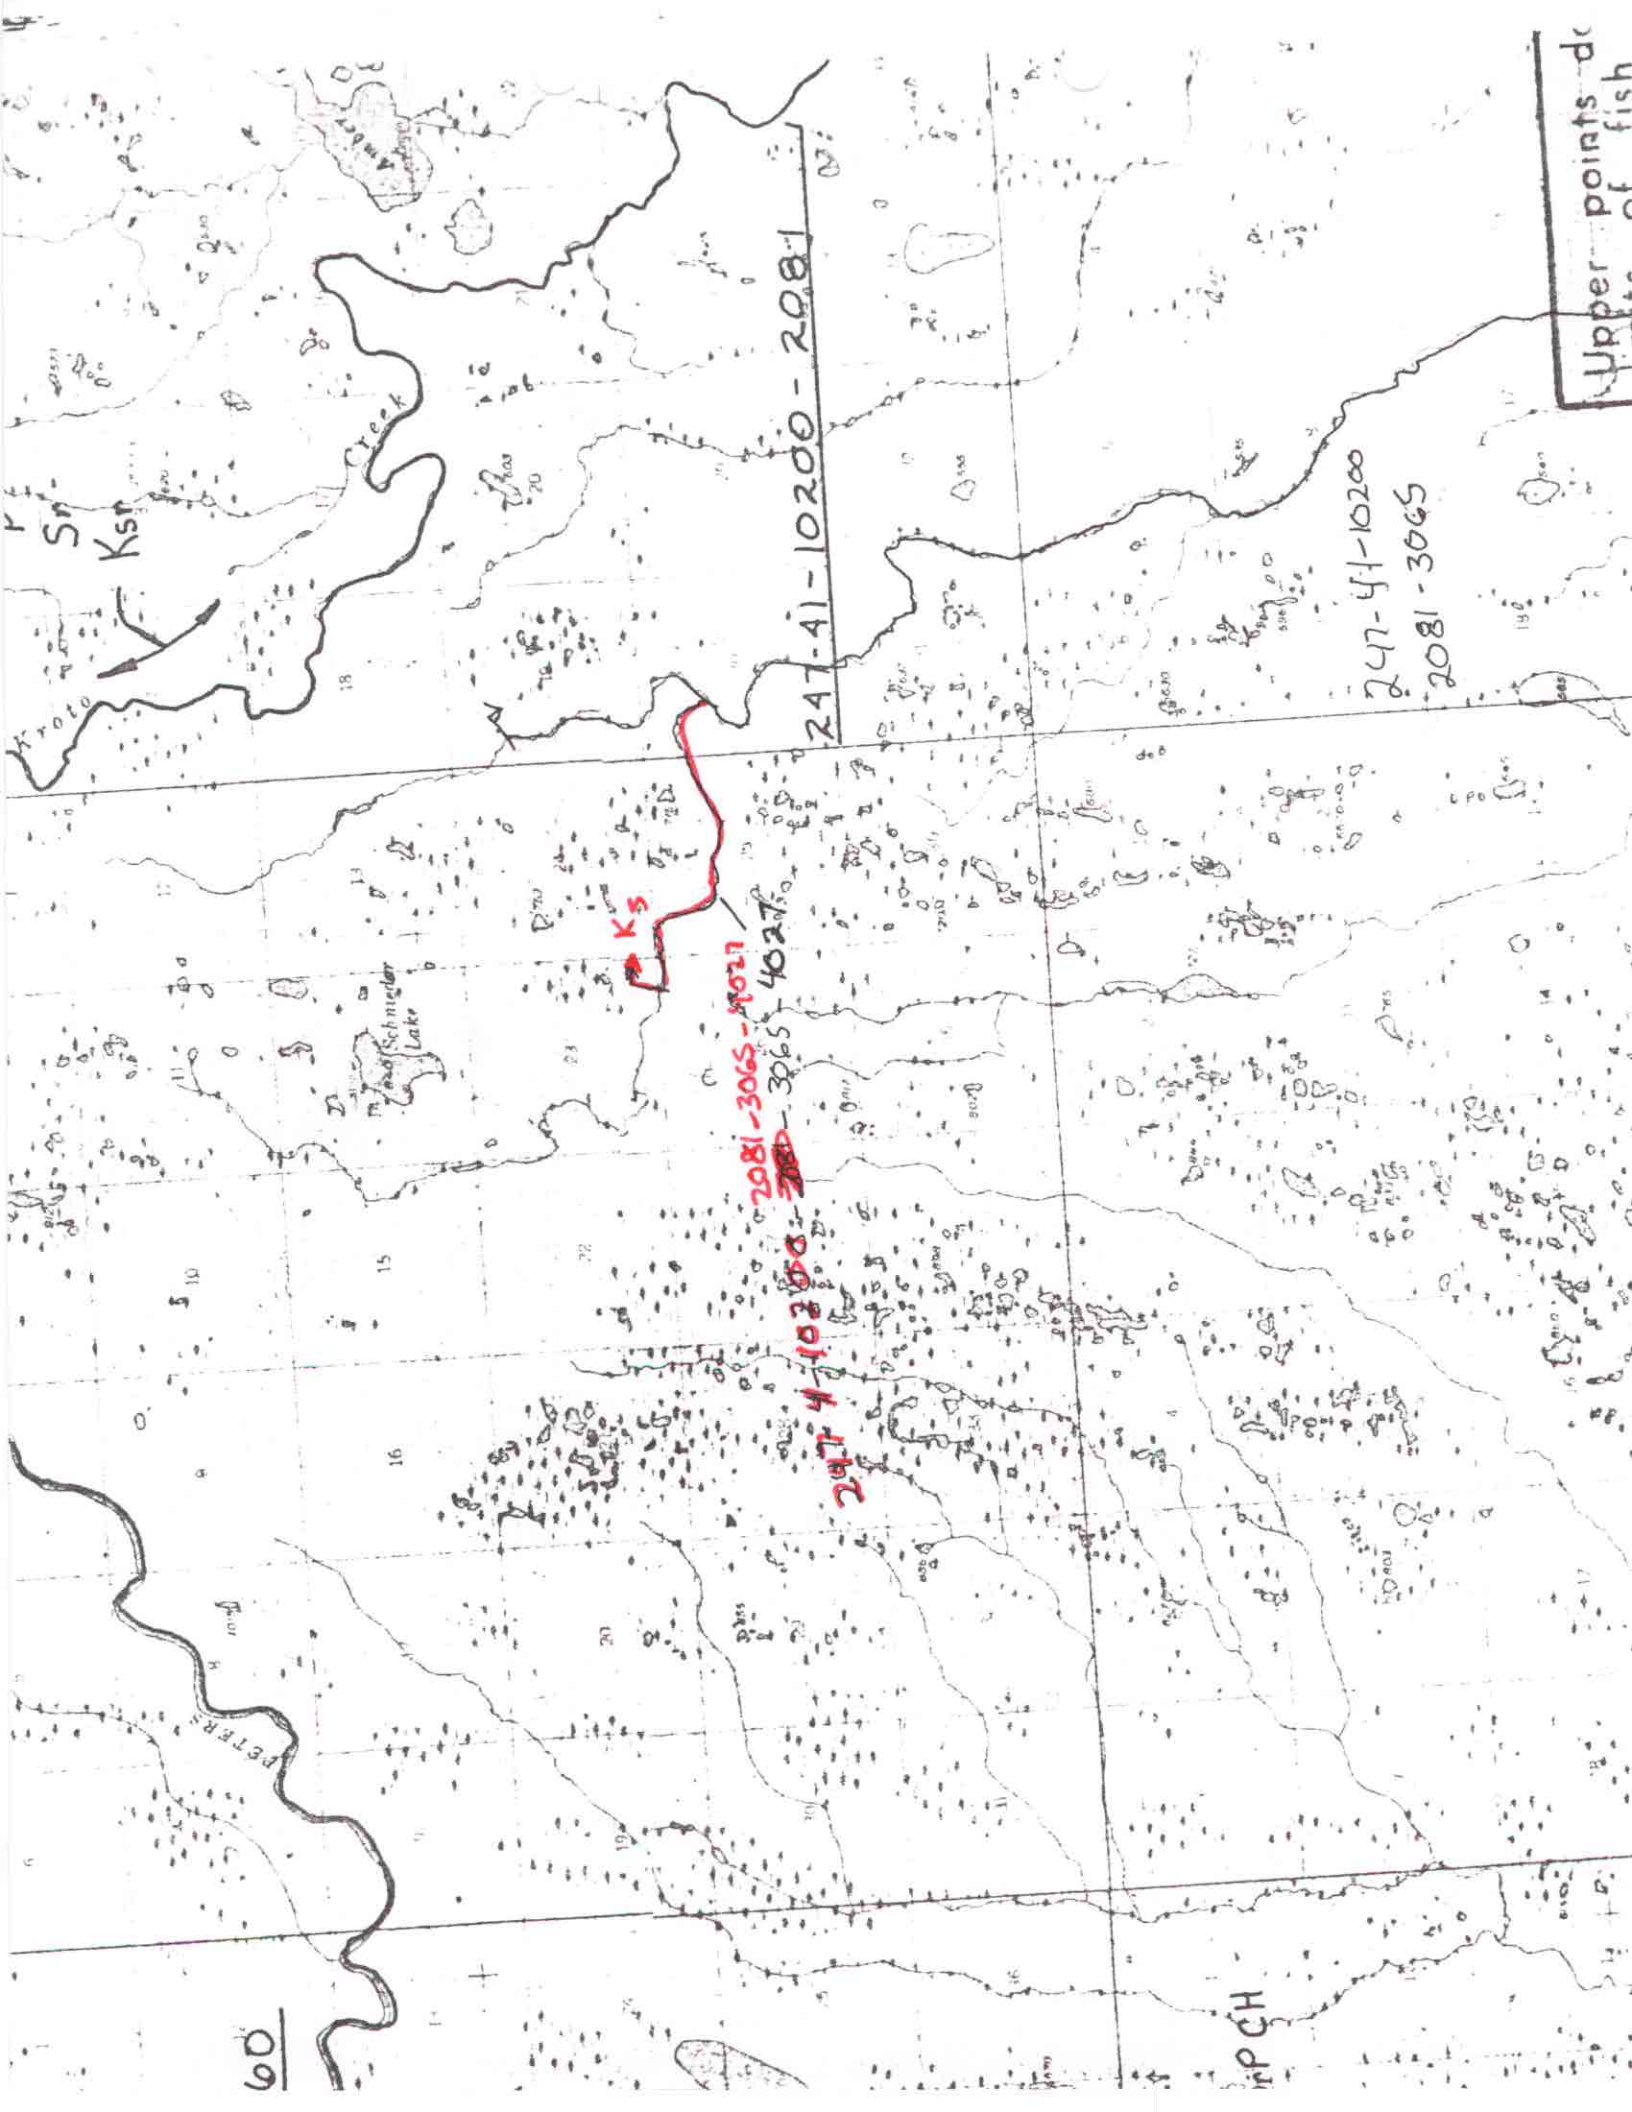

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

SUBJECT: 1983 Chiuk Creek
King Salmon Escapement

I spoke with Dave Rutz today regarding the king salmon escapement on Chiuk Creek. On July 19, 1983, Dave surveyed Chiuk Creek via helicopter and counted approximately 1,200 adult kings. The largest concentrations of spawning salmon were found in the lower third of the creek. However, spawning king salmon were also found as far upstream as the vicinity of Schneider Lake. Dave noted kings in both branches of Chiuk Creek above the forks located just south of Schneider Lake.
